

Maşini simple

# Maşini simple în bucătărie

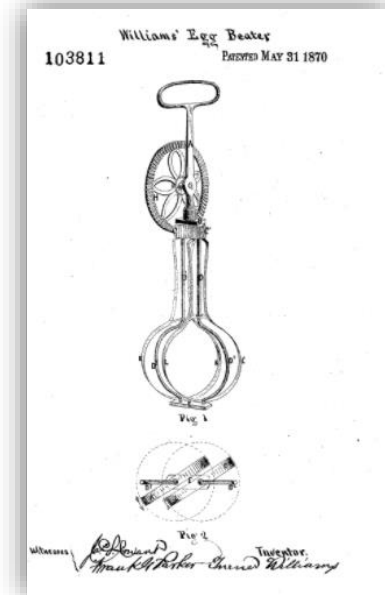

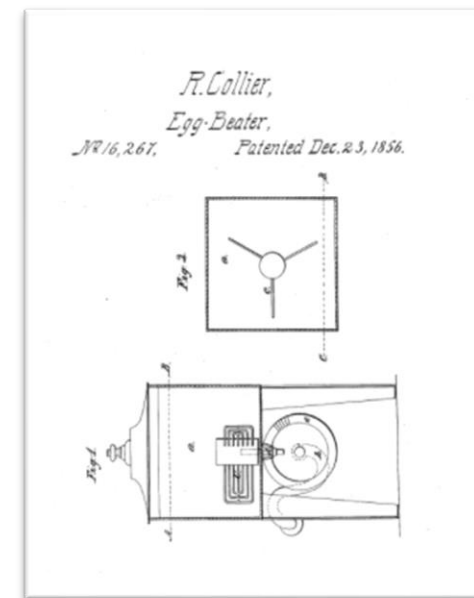

Describe-le colegilor tăi experiența ta când ai făcut ceva dulce folosind mixerul. Ce ai facut?  
De ce ai folosit mixerul?

Primul mixer a fost realizat în 1856 în Baltimore, SUA. Alți inventatori din Anglia și SUA au făcut multe îmbunătățiri în următorii ani.

De la începutul anului 1900, mixerele au fost utilizate pe scară largă în toate bucătăriile. Din 1920 au devenit electrice.

De ce crezi că a fost util mixerul în bucătărie? Cum a ajutat curentul electric?

Discutați despre accesoriile mixerului (de sus în jos: bătător plat, cârlig de aluat în spirală, accesoriu de sârmă)

## Mixerele au 3 trepte:

- Încet: adăugați ingrediente
- Mijloc: amestecare
- Rapid: adaugă aer și dă volum rețetei de dulce

Ce accesoriu  
folosiți în fiecare  
etapă a producției  
de prăjituri?

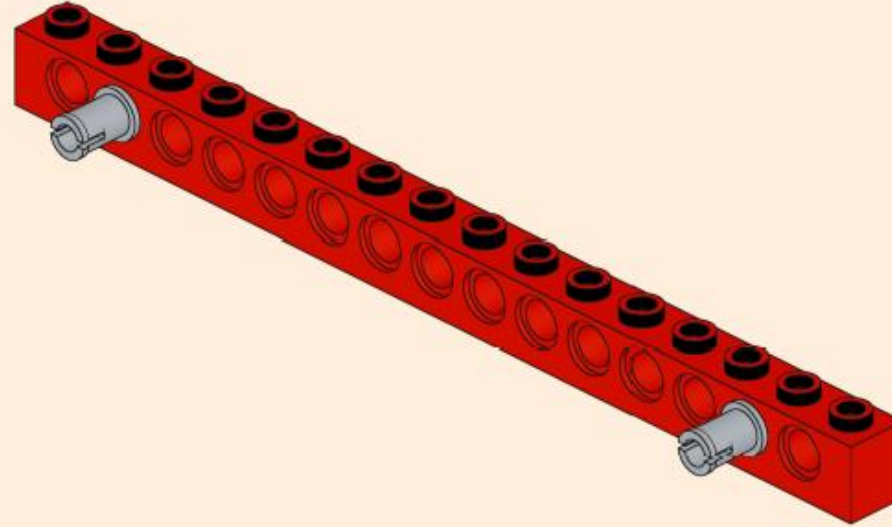

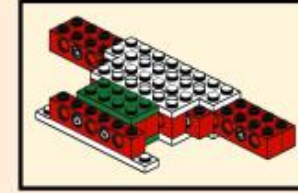

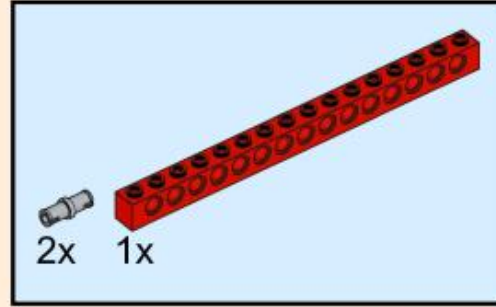

Construcția noastră de astăzi are  
**ROȚI DINȚATE** și o **MANIVELĂ**
